Address: Mayliaduthurai, Tamil Nadu, India - 609304

PROFILE SUMMARY

Computer Science graduate skilled in Python and Java, with backend development experience using Django and Flask. Proficient in frontend technologies including HTML, CSS, with a strong foundation in data structures and databases. Seeking an entry-level role to develop scalable and efficient software solutions.

SKILLS

Programming Languages: Python, Java
Frontend Technologies: HTML, CSS, JavaScript
Tools: Git, VS Code, PyInstaller
Core Concepts: Data Structures, OOPS
Operating System: Windows, Linux
Database: MySQL, PostgreSQL

DEVELOPMENT TOOLS AND ORM
Git | Postman | GitHub | VS code | googlecolab

EDUCATION

BE – CSE **2022 –2026**
Arasu Engineering College, Kumbakonam
CGPA – 7.3

INTERNSHIPS AND CERTIFICATION

Full Stack Java Intern – Nexila Technologies
Gained practical experience in full stack development, working with backend logic, application workflow, and client–server architecture fundamentals.

RESTful APIs Workshop Certificate
Participated in a practical workshop covering REST principles, HTTP methods (GET, POST, PUT, DELETE), API development workflow, and JSON-based communication.

PROJECT EXPERIENCE

Smart Voice Assistive System - Python (May 2025)
Developed a voice-controlled home automation system to operate appliances using speech commands, improving accessibility and user convenience.

Language Translation via Speech
Built a speech-based translation system that converts spoken language into translated output, enhancing multilingual communication using speech recognition technology.

Spotify Ad Detection & Auto Volume Controller
Developed a Windows automation tool that detects Spotify advertisements in real time and automatically adjusts system volume using Windows Core Audio APIs, deployed as a background tray application.

LANGUAGE: Tamil, English **PORTFOLIO:** https://akilan002.github.io/portfolio/
