## ACADEMIC PROJECTS

### FRAUD DETECTION IN FINANCIAL ( May 2024)

#### TRANSACTION

it is important Because it Helps Protect Business,Consumers and Financial institution from:Financial losses,Reputational damage and Sensitive information

### INVOICES DATA EXTRACTION

The process of automatically identifying and retrieving key information from invoices,such as invoice number, vendor details, amounts, and dates.

### SMART VOICE ASSISTIVE SYSTEMS (May2025) [Link](#)

#### Voice Control Appliances

These systems enhance convenience, accessibility, and energy efficiency, especially for elderly and differently-abled individuals.

### Language Translation via Speech

Language barriers can limit access to information, education, business, and social interaction.This project focuses on developing a system that translates spoken language into another language in real-time or near real time.

### Personalized Voice Assistants for Elderly

Systems are often not tailored to meet the unique needs of elderly individuals. Elderly users may face challenges like hearing loss, memory issues, or limited familiarity with technology.
